

# **Solving community problems with documentation**

***What we've learned from Google Season of Docs***

Erin McKean  
Open Source Programs Office  
Google

hello!

SEMICOLON APPRECIATION SOCIETY

Google Season of Docs

# Google Season of Docs

- Created by Sarah Maddox and Andrew Chen
- 2019-2020: mentorship
- 2021-today: grants

# Summer of Code

- [g.co/gsoc](https://g.co/gsoc)
- Mentorship program
- Goals:
  - Build community
  - Give students and beginners experience in open source
- ✨ 20 years! ✨
- VERY BIG

# Season of Docs

- [g.co/seasonofdocs](https://g.co/seasonofdocs)
- Grant program
- Goals:
  - Create documentation
  - Create knowledge of best practices for documentation in open source
- 🎉 6 years! 🎉
- very small

## Research says:

72% of surveyed developers say “Established policies and documentation” is a **key decision factor** when choosing open source.

[2019 Tidelift Developer Survey](#)

## Research says:

“Lack of documentation” was the **top reason** developers gave for deciding ***against*** using an open source project

[2018 Digital Ocean Survey](#)

## Research says:

In both open source projects and enterprises, developers see about **50% productivity boost** with easy-to-source documentation

[2021 State of the Octoverse](#)

## More people

“After the new document was released, daily visits to Casbin and Casdoor almost doubled, and bounce rates dropped by about 30%.” [Casbin](#), 2022

“A 95% increase in the number of users viewing the OpenAPI CLI docs from July.” [Redoc](#), 2021

## More (kinds of) people

“Also, the new manual is much easier for newbies to computational mass spectrometry. To illustrate this point: the CZI grant also provides stipends for historically underprivileged individuals and some awardees have used the new OpenMS manual to jump-start their six-week internship period and have given positive reviews of the new manual.” [OpenMS](#), 2022

## More (knowledgeable) people

“Amarachi created the first edition of the FLINT Analysis Handbook which seeks to guide new users through the "why" and "how" of our software - by describing common analysis tasks, the Handbook takes new users on a journey that increases their skill and capability.” [mojaglobal](#), 2022

“Whereas prior to the documentation existing, only those with technical abilities could build a book! Success!” [Curious Learning](#), 2021

# More (knowledgeable) people

**Carine Diaz** 2 months ago

So now you have at last 2 translators who praised this change specifically!

**Ian Cowley** 2 months ago

Yay! I'm glad the contexts and screenshots are helping people with the translations. It's great to get feedback. Thanks to [@radina](#) for all her patience and for helping me to better understand Kolibri!

[Kolibri](#), 2021

## More (maintainer) people

“We created a steward guidelines as part of the contributor docs to provide both technical instructions on how to work with reviewing issues and PR but also information about how we aim to manage community contributions as a whole.” [p5.js](#) 2022

## More (contributing) people

“The project is without a doubt successful. Having an inclusive guide that we can send potential contributors to is a huge win for us.” [Julia](#), 2021

“Current Contributor Count: 153, surpassing our goal. Notably, the WasmEdge documentation has witnessed a significant rise in contributors, growing from an initial count of 2 to 25.”

[WasmEdge](#), 2023

## More (satisfied & enthusiastic) people

“The project energized and mobilized the whole community in contributing to documentation and influenced other changes like the updates to our governance” [PyMC](#), 2021

“The closure of a set of severe issues related to the site, including the persistent caching bug and the site sometimes freezing on search, can be considered major quality-of-life improvements for users and contributors.” [Sigstore](#), 2023

## More (docs) people

“[We] grew our OSS Docs contributors to 3 more!” [AsyncAPI](#), 2022

“[SoD] helped us recruit two talented technical writers which is highly difficult in a regular setup, who continue to be active OS contributors to OpenMined” [OpenMined](#), 2022

## More (docs) people

“Many people want to contribute to our projects and find documentation an accessible entry point to make valuable new additions. We set up a Documentation Working Group to harness this energy and now lead fortnightly meetings for people to develop new connections and get to know our community.” [mojaglobal](#), 2021

A white sign with black lettering and yellow lights, reading "YOU ARE NOT LOST YOU ARE HERE". The sign is mounted on a metal frame and is illuminated by several yellow lights. The sign is set against a background of green grass and trees. The text is arranged in three lines: "YOU ARE NOT" on the top line, "LOST YOU" on the middle line, and "ARE HERE" on the bottom line. The sign is mounted on a metal frame with several yellow lights along the top edge. The sign is set against a background of green grass and trees. The text is arranged in three lines: "YOU ARE NOT" on the top line, "LOST YOU" on the middle line, and "ARE HERE" on the bottom line.

YOU ARE NOT  
LOST YOU  
ARE HERE

## Fewer (confused) people

“In the support forum's Q&A area, the number of users getting started questions decreases by 20%.” [Mautic](#), 2022

“For the month of November, 95% of the developer’s questions on the public-chat room related to codebase structure and “how-tos” were resolved with a direct link to a wiki page”

[Oppia](#), 2021

Were there any  
new problems?

*All solutions cause  
new problems!*

- Maintainers learned new skills working with technical writers
- Valuable onboarding feedback
- New perspectives on projects

- Recruiting difficulty
- Slow onboarding
- Slow review of contributions
- Lack of clear contract terms
- Payment hiccups
- Communications coordination problems
- Covid and other blockers

“In doc review there’s no set of tests to provide extra reassurance; you really need to carefully check every word.” [Julia](#), 2022

“the rest of the community could continue the work with much higher standards thanks to the guidance and expertise brought by the technical writer.” [Arviz](#), 2021

“Our OSS participants have joked in unison that Technical Writing is much more work than imagined!” [AsyncAPI](#), 2022

- Do you have *enough people*? Do the people have *enough experience*?
- Can you create documentation that will bring *new people*, energize *current people*, and help people *improve their skills*?
- Can people easily *find, use, and contribute* to your documentation?

A neon sign with blue tubes spelling "gentle human thank you for coming" in three lines. The sign is mounted on a dark panel. The text is arranged in three horizontal lines: "gentle human" on the top line, "thank you for" on the middle line, and "coming" on the bottom line. The neon tubes are connected to two black power boxes on the panel. The background is a light-colored wall with recessed lighting fixtures.
