AS FAR AS I COULD FIND

From first FLOSS Poznań public transport app to global coverage with Transitous

A timetable app?!

A timetable app?!

Poznań authorities see sense

- January 2018 — GTFS static[0]
  Bimba 2.0 in September

- Custom real-time API[1]

- August 2019 — GTFS-RT, no alerts

Not only screens and trams

THAT'S ME!

Companion in the Crowd

To infinity and beyond

- Going full-on Transitous
    - Improve stop-times
    - Move custom APIs to client or Transitous
    - https://github.com/motis-project/motis/issues/742
- Even my grandma should be able to use Bimba
- Only one app you need for public transport
- Reading mail is not planned

Thank you for coming, everybody
